NOTE: All mantels ship with a 40" tall inside opening. Depending on which hearth you choose if any or what you chose your finished look to be (insert and header).your cut dimensions for the legs will vary accordingly. Before cutting the legs down confirm the height at which the fireplace will sit with the hearth and any non-comb board that may be required under the hearth (for wood burners).

NOTE: Please note that when installing a 37" cast mantel around a 6000, SL-750, and ST-36 models you will need to order an inside fit front such as the Folio, DF-6 and/or Aero front depending on the model.

NOTE: Please note that when installing a 42" cast mantel around a SL-950 you will need to order and use the Aero inside fit front.
